1. The following is an examiner's statement of reasons for allowance: the closest prior art Fujimoto (USPN 6,387,478) teaches an electrophotographic image receiving material suitable for use in a color laser printer or copy machines, which would include an image forming unit and a fixing device, wherein the image receiving material comprises a base paper comprising polyolefin resin layers on both sides thereof, and a toner image receiving layer containing a toner acceptive material such as polyolefins like polyethylene, polypropylene, and olefin copolymers such as ethylene or propylene. Fujimoto does not teach or fairly suggest that the polyolefin resin layer and the toner image receiving layer containing the polyolefin toner acceptive material have melt viscosity properties as instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
